

MIHIR RATHOD

Data Science Intern

+91 7043612194 mihir2334@gmail.com linkedin.com/in/mihir-rathod github.com/MihirRathod122

Professional Summary

Results-driven Data Analytics professional skilled in SQL, Python, Excel, and Power BI, with strong expertise in data cleaning, exploratory data analysis (EDA), dashboard creation, and data visualization. Proficient in statistical analysis, business intelligence reporting, data validation, KPI monitoring, and advanced Excel functions.

Experienced in transforming raw data into actionable insights, performing trend analysis, building interactive dashboards, and supporting data-driven decision-making through analytical problem solving and business-focused insights.

Technical Skill

Programming & Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Power BI, Tableau, Power Query.

Data Analytics & Machine Learning: Data Quality Assessment ,Requirement Gathering , Exploratory Data Analysis (EDA), Data Visualization, Data Modelling, Regression, Classification, Predictive Modeling, Statistical Analysis.

Business & Analytical Abilities: Business Analysis, KPI Reporting, Dashboard Development, ETL, Data Warehousing, Insight Generation, Problem Solving, Stakeholder Communication, Data Storytelling .

Work Experience

Data Science Intern — Brainy Beams Pvt. Ltd.

May 2025 – Jul 2025

Flight Price Prediction using Outlier Detection and Feature Engineering Tools Used: Power BI, Machine Learning

- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering to prepare flight pricing data for model development.
- Engineered features such as journey date, duration, total stops, and route information to improve prediction accuracy.
- Developed a **Random Forest Regressor model** in Python to accurately predict flight prices and optimize pricing strategies.
- Created interactive Power BI dashboards to visualize insights on airline, route, and timing impacts, supporting data-driven business decisions.

Data Science Intern — Bytes Bizz Technology

Jan 2026 – May 2026

AI-Powered Employee Attrition Analysis

Tools Used: Python, Machine Learning, Power BI, Streamlit

- Built an employee attrition prediction model using machine learning to identify at-risk employees.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering on HR datasets.
- Applied a **Random Forest classifier** to predict attrition and analyzed employee KPIs to support HR decisions.
- Developed interactive dashboards and visualizations to support data-driven workforce management decisions.

Certifications

- **Data Science and ML Certificate – BrainyBeams (2025)** : involving SQL, data cleaning,ML, dashboards, and presentations.
- **Data Analytics Certificate - Deloitte Australia (2025):** Completed tasks in Data Analysis and Forensic Technology, and built a BI Dashboard .
- **Krish Naik's Data Science course (2025):**Certified in Krish Naik's Data Science Udemy course with practical training in Python, EDA, feature engineering, and ML model development.

Education

Btech. Information and Communication Technology

Graduated: 2026

PDEU College, Gandhinagar

CGPA: 7.00 / 10
